

Hyun-Tae Jin

Senior MES DevOps Engineer

(610) 312-6770 | hytjin@gmail.com | [linkedin.com/in/htjin](https://www.linkedin.com/in/htjin) | github.com/HTJin | htae.dev

Plant-side MES engineer on a live production line: deploy and test releases, production support, log and source analysis, and ERP/Oracle integration work. Full-stack background in JavaScript, Java, C#.NET, and SQL. Shipped internal web applications to 2,600+ users.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C#.NET, SQL, HTML/CSS

Frameworks: React, Vite, Vue, Node, Flask, REST APIs

Systems: Oracle, Linux log analysis, ERP interfaces, Jenkins, Windows, disaster recovery

Tools: Git, GitHub, GitLab, Gitea, Bitbucket, Visual Studio, SQL Developer, PowerShell, VS Code, Jira, AWS, Agile/Scrum

EXPERIENCE

Senior MES DevOps Engineer, StarPlus Energy

Dec 2025 - Present

Kokomo, IN | On-site

- Deploy and test MES releases across Mixing, Electrode, Stack, and Assembly on a live production line
- Own month-end ERP settlement and scheduled Oracle maintenance, including data purges, production corrections, and KPI reporting queries
- Triage MES chat and shop-floor incidents: trace Linux logs, analyze MES source and git history, document repro steps, and drive fixes with remote developers, DBAs, and IT Infrastructure
- Run Jenkins-based MES deployments; maintain disaster recovery runbooks and factory revival procedures
- Analyze MES application code (.NET 4.8 WinForms), report defects and fix suggestions to HQ developers; write Python and PowerShell scripts for data and operational automation
- Guide local engineering team on git-flow and code management standards across GitHub, GitLab, and Gitea

MES Software Engineer, StarPlus Energy

Nov 2024 - Nov 2025

Kokomo, IN | On-site

- Supported Stack and Assembly MES on the floor: equipment integration failures, lot tracking, and production hold workflows
- Debugged UI and backend defects with remote developers; authored SQL data corrections and validated fixes under change control

UI / UX Software Engineer, StarPlus Energy

Jan 2024 - Oct 2024

Kokomo, IN | On-site

- Developed MES operator UI components on platform release cycles with distributed engineering teams
- Built internal Vite + React meal-ordering application from scratch; scaled to 2,600+ users across 4 campuses

Freelance Web Developer, 3FGolf

Oct 2023 - Present

Remote

- Ship fantasy golf and LLM-powered apps with React, Vite, TailwindCSS, react-query, and Supabase
- Integrate third-party sports and news APIs; optimize bundle size, caching, and SEO for production traffic

Software Engineer, Co.Lab

Sep - Nov 2023

Seattle, WA | Remote

- Built Matrimoni wedding-planning app in an 8-week sprint; owned git workflow, architecture, and project board

Application Developer, Highmark Health Solutions

Mar 2019 - May 2020

Pittsburgh, PA | Hybrid

- Lead developer on clinical web portal for patient data search; mentored developer on Vue with Java backend
- Maintained Pega-based Utilization Management tooling in Scrum team; championed Vue adoption and GitLab workflow

Web Developer, Checkmate Digital

Sep 2017 - Jan 2019

New Haven, CT | Remote

- Delivered end-to-end web applications for startup clients in an agency environment
- Led Angular-to-React migration with CTO; established component patterns and build tooling for the new stack

EDUCATION & CERTIFICATIONS

University of Pittsburgh, B.S. Computer/Information Science, Networks and Security

Certifications: Coding Temple Certified Software Engineer (2023), Co.Lab Software Development Certificate (2023)
