

Hyun-Tae Jin

Software Engineer Experienced in Manufacturing and Web/Internet Technology

(610) 312-6770 | hytaei@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

TECHNICAL SKILLS

Certifications: [Coding Temple](#), [Co.Lab](#)

Technologies: JavaScript/TypeScript, React, Next, HTML5, CSS, Vue, Nuxt, Vuex, Redux, Angular, Vite, Node, Express, SQL, C#, .NET, Postgres, MongoDB, GraphQL, Python, Flask, Jinja, Java, PHP, MySQL, TailwindCSS, Ruby, Jekyll, Polymer, React Query, Supabase
Tools: GitHub, GitLab, AWS, Firebase, Vercel, Postman, Insomnia, Glitch, Render, VSCode, Terminal/Powershell, Jira, Harvest, Oracle
Discipline: Agile/Scrum, Resolve Merge Conflicts, Code Reviews, Configure API Endpoints, Functional/OOP, UI/UX

EXPERIENCE

Manufacturing Execution Systems Software Engineer @ StarPlus Energy | Kokomo, IN | On-site 09/2024 - Present

- Dedicated Software Engineer for the factory's Mixing, Electrode, Stack, and Assembly shop division
- Work closely with Process Innovation Managers to troubleshoot machinery and equipment on the factor floor
- Facilitate functional and technical communication by translating and interpreting English and Korean in a dual cultural joint venture environment for Samsung and Stellantis
- Lead software engineering team, establishing efficient team dynamics and proper code management
- Handle database architecture and correction of factory data needed for overall production of battery cells and KPI reporting

UI / UX Software Engineer @ StarPlus Energy | Kokomo, IN | On-site 01/2024 - Present

- Develop intuitive user interface and assess data management for Manufacturing Execution System in affiliation with Samsung SDI, Samsung SDS, and Stellantis
- Created web application for 350+ employees to select and order Korean food options for company provided lunch and dinner, growing to serve a user base of 2200+ across 4 company campuses
- Provide efficient solutions for General Affairs department and local food vendors, handling both Korean and Continental based cuisine menus

Software Engineer @ Co.Lab | Seattle, WA | Remote 09/2023 - 11/2023

- Completed an intensive 8-week program, where I played a pivotal role in developing the 'Matrimoni' app, a search engine tool designed to simplify wedding planning
- Managed git flow, app architecture, and the Trello project board, advocating strong organizational skills
- Worked closely with a co-developer and a designer, adapting to role changes and communication challenges

Full Stack Software Developer Trainee @ Coding Temple | Chicago, IL | Remote 04/2023 - 06/2023

- Graduated from a rigorous bootcamp with a focus on Python, Flask, React, Typescript, Javascript, HTML/CSS, and SQL
- Enhanced programming proficiency through diverse personal projects and modern coding standards
- Gained experience integrating third-party APIs and libraries, building full-stack applications with custom endpoints and JWT

Application Developer @ Highmark Health Solutions | Pittsburgh, PA | Hybrid 03/2019 - 05/2020

- Served as lead developer for a web portal enabling healthcare professionals to search patient data based on UMI
- Collaborated within a full scrum team, managed story points for sprints, and mentored team developer in Javascript/HTML/CSS to utilize Vue with a Java backend
- Maintained git-flow with GitLab, configured the Babel Transpiler for IE7 compatibility and championed the adoption of Vue as a framework within the company
- Leveraged the PegaSystems Platform to maintain and develop Highmark's Utilization Management tool for healthcare professionals in Pittsburgh

Web Developer @ Checkmate Digital | New Haven, CT | Remote 09/2017 - 01/2019

Developed operational web apps for other tech startups, translating high-fidelity designs into fully functional digital solutions

- Engaged in end-to-end project development, collaborating with the UX/UI team and providing comprehensive web solutions for tech startup clients under the agency's purview
 - Pioneered a tech stack transition from Angular to React in close partnership with the CTO, enhancing the agency's technological capabilities
 - Expanded technical knowledge by learning various JavaScript frameworks and libraries, adhering to industry-defined coding standards, and implementing effective git-flow practices
 - Cultivated a deep understanding of the product life cycle, contributing to all stages from conceptualization to deployment
-

EDUCATION

University of Pittsburgh - B.S. in Computer/Information Science, Concentration in Networks and Security
